Disk Blades

Features and Benefits
To meet the demanding needs of today's tillage equipment, we will offer disks manufactured from a unique new alloy steel with the following features and benefits:

- Wear - better than previous Earth Metal material formulation, which has been the standard of the tillage industry for over 20 years. These results have been validated in both lab and field tests.
- Toughness - This new alloy material will offer a product even tougher and stronger than our previous blades and sweeps, which have outperformed the competition for over 20 years.
- Shape Control - Wobble on disks will be reduced by more than 75% for improved performance
- Machined edge for better penetration and edge durability
- Diameter increase - The diameter on all 26", 28", 32" blades has been increased by 1/2" to provide more material in the critical 2-3" wear zone.
- All blades are manufactured in North America for consistent high quality
