Q. What do most producers consider the absolute, hands-down, most cost-efficient method to dry grain?
A. When you run your bin fans on a LOW humidity fall day, and just let dry fall air effectively, efficiently take grain moisture out. NOW YOU JUST NEED MORE LOW HUMIDITY DAYS! Now, teaming up Econodri Transitions with VAL 6 high-intensity radiants can provide a hybrid effect of drying air, and raising air temps, with remarkable fuel economy, reliability, and ease of expansion....plus a space heater that you'll use all winter in your shop!
